I AM NCR CONFIGURATION CENTER

Easily make database changes to multiple sites from anywhere

Remotely access your site systems and perform updates automatically

NCR Configuration Center is a centralized database management application that allows for Aloha POS configuration settings for mult-store restaurant organizations. It offers remote distribution and access capabilities through an easy-to-use .NET rich-client interface.

Access your configuration data from anywhere
NCR Configuration Center provides secure access to your hosted configuration data from any location. Network administration, data backup, server software and hardware maintenance are managed for you, allowing you to focus on your business.
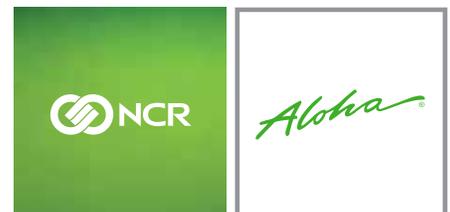

Control your data with security roles and permissions
A single point of administration can be accessed from anywhere with the confidence that a redundant infrastructure is consistently backing up your menus, labor, taxes and other corporate data.

Distribute data automatically and perform real-time updates
Easily update menu items, price changes or POS configurations across multiple sites automatically. NCR Configuration Center enables administrators to manage and schedule changes to the database in multi-site environments using an automated distribution process.

NCR | Aloha

Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables more than 550 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

The company encourages investors to visit its web site which is updated regularly with financial and other important information about NCR.

Key features

Invest in efficiency
Access your NCR Configuration Center database from virtually any computer at a fraction of the cost of doing it yourself.

Rich, easy-to-use interface
Intuitively designed for the novice user with a rich set of advanced features and tools for the power user. The new 'grid view' style of each function screen keeps your data visible when you add or edit records in the application.

Offline mode capability
If connection to the hosted database is temporarily lost, all functions are available offline and any changes made are automatically synchronized when connectivity is restored.

Data integrity and recovery
NCR Configuration Center keeps corporate and store data synchronized at all times to allow for consistent reporting and effective systems management. Your configuration data is protected by automatic backup and disaster recovery support enabled by a robust data center infrastructure.

Built-in security
Multiple layers of security ensure that your data is protected. Role-based user security and record-level data security prevent individual users from accessing designated areas. You have complete control over which types of data can be viewed and/or edited by each user.

Automatic application upgrades
NCR Configuration Center checks for available upgrades each time it starts up. If a version upgrade is available, the system will download the new store client files and apply them.
